ADVERTISING MATERIAL TRADING L.L.C.
DUBAI | SHARJAH | QATAR

Corporate Profile

With its routes in the advertising material industry since 2008, Signmax Group UAE, a premier distributor for quality and value added solutions of advertising materials now extends its operation in Qatar. Our goal is to exceed the expectations of every client by offering innovative and quality product.

Signmax Trading believes that only the customer satisfaction is the way to build up the strong business relationship.

Infrastructure & Facilities

A strong infrastructure is the backbone of any company. Signmax Group strengthened its infrastructure in short span of time. Now-a-days it consists of spacious showrooms and warehouses strategically and geographically located in its territories of operation.

Products & Services

Over the years, Signmax product line has reached in to a considerable range. We are the sole distributor in the industry for large number of well renowned sign materials including LED Strips, LED Transformers, Neon Products, Digital print media, color Vinyl, Reflective films, Engineering Plastics and foam sheet etc.

Signmax®
LED STRIPS

LED Strips

Signmax LED Strips Specializes in developing & marketing of LED lighting products. Our products are widely applied to advertising sign, channel letter, light box & decoration, etc.

Practice makes perfect. With many years' advanced LED technology research & abundant experimental experience, The majority of our products have been awarded the CE, RoHS FCC & UL certificate . We strongly believe in our slogan "Maximize your opportunity"! To develop innovative practical solutions, We aim to offer a wide range of quality products with excellent services, to put forward endless options in the LED industry.

3528 LED STRIPS 60SMD

3528 LED STRIPS 60 SMD

CHIP	3528
SMD	60 LED / Mtr
Power	12V DC,24W/Roll
Qty	5mtr /Roll
Ip Rating	20
Veiwng Angle	120°

Release Liner	Specially produced highly stable 138g /sqm silicone coated Kraft paper.	
Thickness	100 micron.	
Adhesive	Acrylic Permanent Clear Adhesive. (3100-3101-3982-3983) Acrylic Permanent Grey Adhesive . (3108-3109)	
Printing	Suitable with Solvent, ECO Solvent, UV and Latex technology.	
Durability	Interior areas unlimited - Exterior 3 years	
Area of Use	3900 Digital Printing Films are designed for providing short and medium term solutions to all kind of glass surfaces, signs, guiding marks, show cases and exhibitions.	
Dimensions	104 cm x 50 m	152 cm x 50m
	126 cm x 50 m	200 cm x 50 m
	137 cm x 50 m	

9520

SPECIFICATION

Premium Cast Digital Vehicle Wrapping Series

UNICAST 9520 films are specially produced for vehicle (cars, boats, trains) wrapping applications using the latest ingredients in the cast PVC formulation. This Premium quality product provides a long service life and brings high performance with its Premium quality, high gloss, print-ability and flexibility.

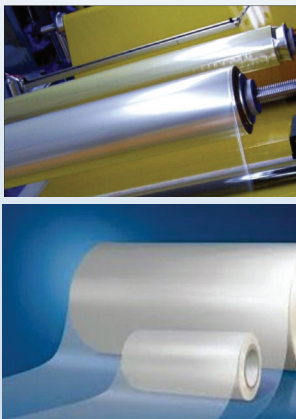

Unicast 9520 Films have excellent dimensional stability properties and coupled with exceptional printability and flexibility offers a very high level of performance for all vehicle wrapping applications.

Release Liner	Specially produced highly stable 138g /sqm silicone coated Kraft paper.
Thickness	55micron.
Adhesive	9520 Solvent based acrylic permanent grey adhesive.
Printing	Suitable with Solvent, ECO Solvent, UV and Latex technology.
Durability	7 years.
Area of Use	Designed for wrapping vehicles and complex curved surfaces requiring a high- performance application.
Dimensions	137 cm x 50 m, 152.7cm x 50 m.

Clear Vinyl Lamination Film

The monomeric glossy/matte cold lamination film using highest quality face film in combination with premium adhesive system that has highest clarity, and transparency for bringing images to live.

Maxcal opaque monomeric color vinyl using highest quality base film and adhesive system, giving highest contrast and durability to your outdoor signs.

Maxcal cutting vinyl is designed with high opacity, using permanent solvent based adhesive for short to medium term (2-3 years) outdoor application with excellent cutting and weeding characteristics.

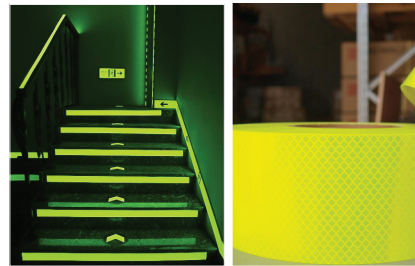

Glass Etch / Frosted Vinyl

Window Decorative ETCH grade of window film is especially developed for decorative and functional graphics on windows, screens, doors and mirrors. Window ETCH with dusted glitters for eye-catching visual effect with excellent dimensional stability.

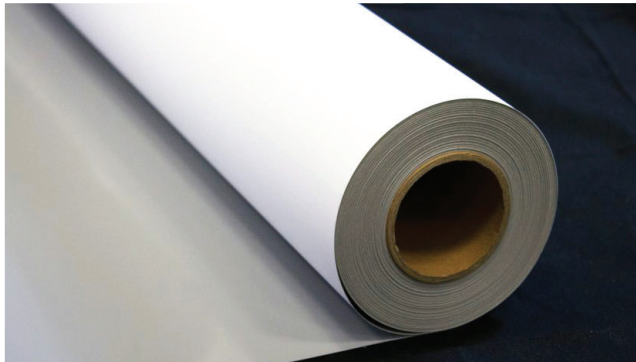

Reflective Film

Reflective material primarily used to increase the nighttime conspicuity of traffic signs, high-visibility clothing, and other items so they are safely and effectively visible in the light of an approaching driver's headlamps. The sheeting consists of reflective glass beads, microprisms, or encapsulated lenses sealed onto a fabric or plastic substrate. Many different colors and degrees of reflection intensity are provided by numerous manufacturers for various applications. As with any reflector, sheeting glows brightly when there is a small angle between the observer's eye and the light source directed toward the sheeting, but appears non reflective when viewed from other directions.

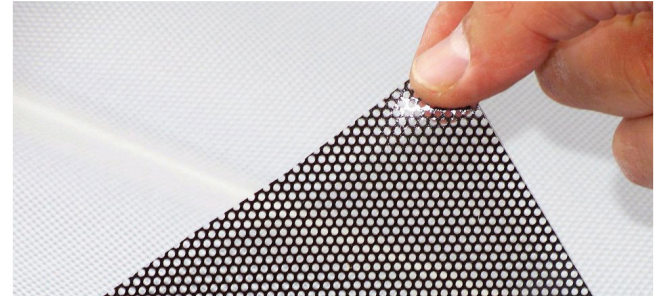

Roll up media

POLYPROPYLENE FILM coated for solvent and is excellent printing with eco-solvent ink, it is quick dry and a good economy POS. Using lamination for longer POS life and to enhance gloss level if needed. Our popular POP UP / ROLL UP film constructed by laminated PVC and polyester base film with no curling on both sides, this semi matt film is safe on printer with piezo heads thanks to its anti-static formulation and surface treatment, the matt backing ensures no sticking to the back at take-up and no slip on some printer models.

Oneway Vision

One way vision film for static applications and mobile advertising on glass surfaces. Window graphics onto flat glass surfaces showing advertising on one side and allowing for "See through" view on the other side. Designed for solvent based inkjet printing on most wide – format printing equipment.

Frontlit Banner

Laminated front lit with little light penetration, it suits for large billboards, banners and indoor or outdoor sign with silk screen and wide – format digital printing and display system etc.

HALCO ADHESIVE TAPES

KLASSE F10 **DOUBLE SIDED FOAM TAPE**

Klasse F10 is a double sided foam tape that offers an outstanding, secure and reliable bonding solution for all uneven surfaces. The polyethylene foam carrier is coated with a high bond acrylic adhesive that is resistant to elevated temperatures, U.V and difficult substrates.

KLASSE F40 **DOUBLE SIDED POLYESTER TAPE**

Klasse F40 is a double sided adhesive tape that offers an outstanding, secure and reliable bonding solution. Its clear polyester film carrier is coated with a high bond acrylic adhesive that is resistant to elevated temperatures, U.V and difficult substrates

KLASSE F30 **DOUBLE SIDED PVC TAPE**

Klasse F30 is a double sided tape that offers an outstanding, secure and reliable bonding solution for all surfaces. Its thick white PVC carrier is coated with a high bond acrylic adhesive that is resistant to elevated temperatures.

KLASSE FT DOUBLE SIDED **TRANSFER TAPES**

Klasse FT Transfer tapes are double sided high strength acrylic adhesive tapes that have no carrier.

KLASSE X-SERIES DOUBLE **SIDED VERY HIGH BOND TAPE**

Klasse X-Series tapes are double-sided acrylic foam tapes with super-strength adhesive power. Useful in a range of industries including automotive, signage and electronics.

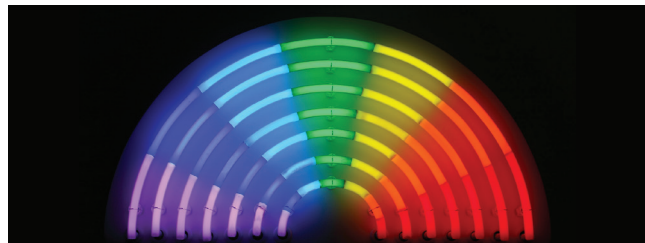

ADHESIVE BACKED HOOK **& LOOP TAPE**

HALCO adhesive-backed hook & loop tapes are coated with an aggressive rubber-based adhesive, ideal for indoor use on smooth surfaces for most general purpose applications.

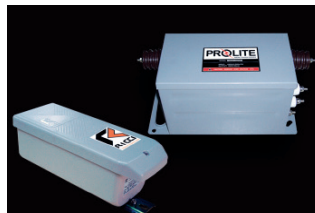

Application Tapes

The popularity of RTape application tapes and premasks is no accident. The fact is, RTape's premasks and tapes just perform better than the competition. RTape superior technologies are part of our secret. RTape manufacturing processes also play an important supporting role. Above all, our wide product range is designed to satisfy our customers' specific needs. When you talk, we listen. For us, "voice of the customer" is not just a clever catchphrase, it's key in how we do business.

Neon Products

In the signage industry, neon signs are electric signs lighted by long luminous gas-discharge tubes that contain rarefied neon or other gases. In addition to signage, neon lighting is now used frequently by artists and architects. The signage industry has declined in the past several decades, and cities are now concerned with preserving and restoring their antique neon signs.

NEON SUPPORTER

Channelume

Channelume letters speak forcefully from outdoors and indoor storefronts of businesses worldwide. Channel letter signs handcrafted with Channelume are unmatched for style and appearance and are an effective, economical way finding tool in any language.

Aluminium Composite Panel

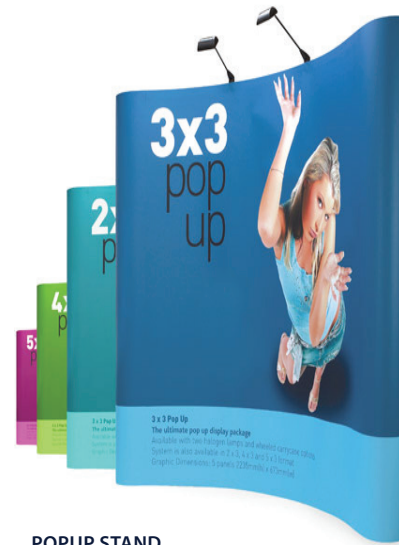

Maxbond shows excellent product properties such as extraordinary flatness, a large variety of colours and perfect formability. It has been developed as a rigid and, at the same time, flexible fascia material for architecture. Maxbond is extremely weatherproof, impact-resistant and break-proof, vibration-damping, and ensures easy and fast installation.

Display Items

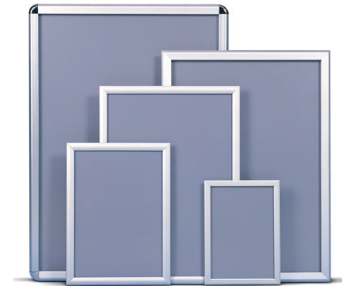

Your figures and tables, also known as display items, are essentially graphical representations of the results described in the text. They are also the most effective and efficient way to present your results. Good figures and tables quickly tell the reader exactly what you found in your study.

PVC Foam Sheet

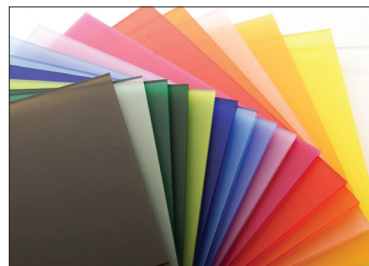

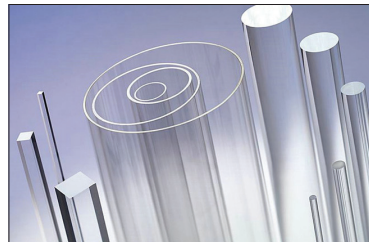

Max Foam PVC foam sheet is a flexible, economical, extremely versatile PVC-U sheet. The fine cell structure and smooth surface finish makes it the preferred-choice of professional printers and sign makers. Whether it be for signs, billboards or displays, the superior quality always ensures dependable, reliable performance and excellent results.

Paper Foam Sheet

Acrylic Sheet

Acrylic plastic refers to a family of synthetic, or man-made, plastic materials containing one or more derivatives of acrylic acid. The most common acrylic plastic is polymethyl methacrylate (PMMA). PMMA is a tough, highly transparent material with excellent resistance to ultraviolet radiation and weathering. It can be colored, molded, cut, drilled, and formed. These properties make it ideal for many applications including airplane windshields, skylights, automobile taillights, and outdoor signs. One notable application is the ceiling of the Houston Astrodome which is composed of hundreds of double-insulating panels of PMMA acrylic plastic.

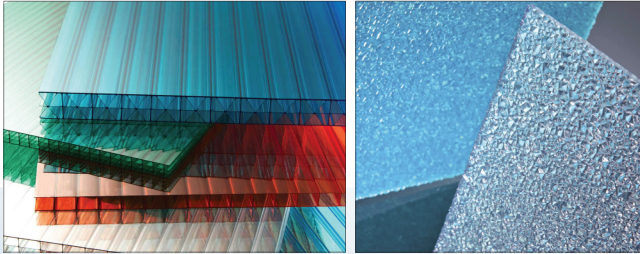

Polycarbonate Sheets

If you are looking for a high quality polycarbonate sheet which features the latest in product technology and which comes with the kind of personal service you need, Our Polycarbonate sheets are an effective alternative to traditional glazing in a wide variety of applications.

High Light Transmission

Our sheet offers a high degree of light transmittance while blocking harmful ultra violet rays. In its structured form, our polycarbonate also offers excellent thermal insulation properties.

Virtually unbreakable

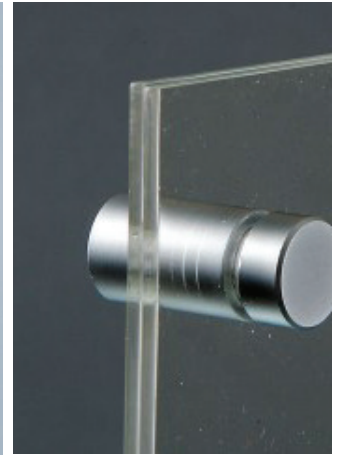

Structured sheets is economical and light in weight, yet is 10 times stronger than acrylic and 200 times stronger than glass.

Easily fabricated on site

Highly flexible, our polycarbonate solid and multiwall sheets can be easily cold formed and will not crack or splinter when fabricated.

Anti-drip / Anti-fog coating

This high-tech discovery ensure that greenhouse condensation is carried away from the roofing so that droplets will not damage your nursery stock.
